## TROUBLESHOOTING

No.	Problem	Possible Cause	Solution
1	You hear a whirring or rubbing sound.	It is a normal sound made by the working motor or the sound is produced when the massage balls rubbed against the cloth cover.	It is normal and no need for treatment.
2	The machine can not be started up.	The power supply plug is detached.	Insert the power supply plug into the socket again.
		The power supply switch is not turned on.	Turn on the switch
		The fuse of massage chair blew out.	Replace a new one with the same mode
3	Some music can not be played normally	To check whether the format of music is MP3.	Replace the MP3 music file
4	Alarm sound is heard when pressing the music control button.	The U-disk is not connected well.	Insert the U-disk again.
		The U-disk is initializing	Wait 5-10 seconds
		The format of music files in U-disk is not unmatched.	To check MP3 music files with the help of computer.
5	No sound from the speaker or earphone	The volume is turned to lowest.	Turn the volume up
		The waiting time of the massage chair is over 2 hours.	Press the  button again
6	Backrest or legrest can not ascend or descend.	Over pressure is put on backrest or legrest.	Reduce the pressure on backrest or legrest.
7	The airbag installed at seat cushion or legrest can not work.	To check whether there is air tube blockage.	To clear the air tube
8	Some fault code ("E0-E7") is displayed while the main controller is buzzing.	The massage chair has automatically detected some exception.	Cut off the power supply and start up the machine again to check whether it can return to normal, if not, please send it to the professional maintenance center for repair and maintenance.

If abnormal phenomenon still remains after above measures have been taken to the massage chair, please contact local distributor for repair and maintenance.

Note: Do not dismantle the product by yourself, and our company shall shoulder no responsibility to the damage of the product or the injury of people caused by improper use! Thank you for your cooperation.

## SAFETY PRECAUTIONS

### Interior structure

## ► NAME AND FUNCTION OF EACH COMPONENT

### Power supplybox

#### ⚠ Caution:

- ▶ Do not let children play on the chair in case anything happens due to the power supply box.
- ▶ Please power off the chair and unplug the chair from the power supply socket after the massage finishes.
- ▶ Do not use the chair during thunderstorms.
- ▶ Please power off the chair and unplug the chair from the power supply socket when the chair is not in use, so that children won't accidentally get the chair started.
- ▶ Please store the chair if it is not in use for a long time.
- ▶ Please do not move the massage chair on easily damaged surfaces, such as wooden floors and carpets.
- ▶ Do not use the massage chair in damp environments to avoid electric leakage or electric shock.
- ▶ Do not place the massage chair near stoves or where it will be exposed to strong sunlight for long periods as this may damage the leather and bleach the color.

## ► PREPARATION BEFORE USING

### Move method

- ▶ The equipment can be easily moved with the casters installed at the bottom of the product.
- ▶ Ascend the backrest to the highest position.
- ▶ Turn off the power supply switch and pull out the plug.
- ▶ Raise the front part of the chair as shown on the picture below, and move the chair to a desirable place.

#### ⚠ Caution

- ▶ Do not move the chair while people are sitting on the chair.
- ▶ When moving the massage chair, please hold its base and backrest instead of its armrests (at least 4 people).

### Turn on powersupply

- ▶ Put the power supply plug into a well-grounding three-core power supply socket.
- ▶ Turn on the power supply switch located at the bottom of the backrest.

#### 20. Airbag intensity indication

5 degrees adjustable

**AIR FORCE** / / / / /

#### 21. back heating indication

#### 22. seat twist indication

## ► FUNCTIONS AND FEATURES

### 1. shouler position

shoulder detecting function can locate exact position of shoulders of different people, thus to ensure the most effective massage on shoulder and neck.

### 2. Zero gravity

Abiding and imitating principle of space capsule, the Product can give fully relax and most comfortable massage posture, it conforms to ergonomics and keep back, buttocks and legs in a weightless status, thus to ensure people on the Product lay in a most relaxed reclining angle, then weight of body will fully be released on the Products, muscles will also be in a completely relax condition, from which people can enjoy weightless massage experience.

### 3. Four-wheel massage mechanism

Innovated design of four wheels massage mechanism and walking structures, it conforms to ergonomics.

### 4.6 massage strengths

Under manual mode & auto mode, 6 massage strengths are optional, people can choose the most desirable one according to health condition and massage time.

### 5. airbag pressure massage for arms

upper and lower airbags design to realize wavelike massage on arms.

### 6. Shoulder massage

Side airbags installed on both sides of shoulders, it can give air pressure massage on shoulders.

### 7. air pressure massage pillow

Pillow airbags can conduct swinging and kneading massage on neck.

### 8. Waist twist and airbag massage on seat

Waist twist function in seat, airbag pressure massage on thigh and waists.

### 9. Airbags pressure massage on leg and feet, rolling massage on sole

Multi-layer airbag design to ensure quick and abundant massage on leg & feet, three rows of rollers located under sole to conduct shiatsu massage on sole, arch and heel offeet.

### 10. Mp3 & DVD(optional)

Mp3 function, DVD is optional as per requirement of customer.

### 11. Touchkey

Controller is adopt to touch key, it looks morefashional.

## ► PREPARATION BEFORE USING

### Installation position

Safety distance for the periphery of massage chair

- The horizontal interval of backrest between the highest and lowest points should be over 50cm.

- The horizontal interval of legrest between the highest and lowest points should be over 40cm.

### Floor protection

- The floor may be worn by the massage chair, so it is advised to put some cushion material (for instance: a carpet) under the massage chair to protect the floor.

### Surrounding environment

Keep the massage chair away from damp places (for example: bathroom) to avoid electric leakage.

Keep the massage chair away from high temperature resources (for example: stove) to avoid fire or damage to leather material.

### Earthing

- This massage chair is a Level One electrical appliance, make sure to use three-core power supply socket and to guarantee the ground wire connected to the power supply socket has obtained good ground connection to avoid electric leakage, electric shock and some other negative effect during use.
